Summary

Full-Stack Developer with experience building full-stack web applications using the MERN stack. Skilled in developing RESTful APIs, and designing scalable application workflows. Interested in full-stack, backend, and data-driven development roles where strong engineering fundamentals and analytical thinking can be applied to build reliable and user-focused software.

Experience

Software Development Intern March 2026 – Present
Square Yards *Gurugram, India*

- Contributing to a SaaS product built on Next.js and Node.js that wraps AI image generation APIs, targeted at interior design workflows — implementing frontend changes from Figma and ensuring pixel-accurate UI delivery
- Contributed to backend development in Node.js including building authentication flows, implementing security measures for outbound AI API calls, and optimizing asset delivery pipelines with CDN integration for improved frontend performance

Enterprise Resource Planning (ERP) Intern June 2025 – July 2025
Walker Chandiok & Co. LLP (Grant Thornton Bharat) *Gurugram, India*

- Tested and validated end-to-end ERP workflows related to chargeable and non-chargeable jobs, timesheet entries, approvals, and expense reporting for 100+ internal users, ensuring smooth day-to-day system usability.
- Analyzed cross system dependencies between the firm's ERP platform (WCGT360) and Salesforce-based client onboarding tools, ensuring accurate data flow across the client lifecycle and reducing potential onboarding friction.

Projects

Flickstat.com | *Next.js, TypeScript, Tailwind CSS, Supabase, Python* | flickstat.com

- Built and deployed a production football analytics platform covering FIFA World Cup 2026 and Premier League statistics, serving real-time data to live users at flickstat.com
- Engineered Python web scrapers running on cron jobs to continuously harvest match and player data from multiple sources, implementing name normalization logic to resolve entity conflicts across datasets and ensure consistent database entries in Supabase.
- Developed the frontend in Next.js, TypeScript, and Tailwind CSS, building data-rich UI components that surface live player and match statistics with a clean, responsive interface

AI Study Buddy | *Next.js, React, MongoDB, OpenRouter, Cloudinary* | GitHub

- Built a full-stack AI-powered study application where users upload notes, PDFs, and images to generate flashcards, quizzes, and summaries using OpenRouter's free vision capable models.
- Engineered a multimodal vision pipeline that uploads images to Cloudinary and passes public URLs to a three-model fallback chain, extracting handwritten text and diagram content with graceful degradation on rate limits.

Shared Wallet (Splitwise Clone) | *Next.js, React, Convex, Clerk, Tailwind* | GitHub

- Built a real-time expense sharing application supporting group expenses, settlements, and balance tracking using a 2D ledger model for debt resolution.
- Implemented real-time data synchronization and conflict handling using Convex, simplifying concurrency management for multiple users updating shared expenses.

Technical Skills

Languages: JavaScript, Java, Python, SQL (MySQL), HTML/CSS
Frameworks: React.js, Next.js, Node.js, Express.js, Tailwind CSS
Databases & Auth: MongoDB, Convex, Clerk, Zod , Postgresql
Developer Tools: Git, GitHub, Docker, VS Code
Platforms: Vercel, Firebase, AWS, Power BI, Excel

Education

Manipal University Jaipur Oct 2022 – Oct 2026
B.Tech in Computer Science and Engineering *Manipal, India*
Delhi Public School Apr 2020 – Aug 2022
Higher Secondary Education (PCM) *Faridabad, India*
